### **DETAILED ACTION**

Applicant's amendment dated 09/29/2005 has been received and entered. By the amendment, claims 1-8 and newly added claims 9-10 are now pending in the application.

Applicant's arguments with respect to claims 1 and 9 have been considered but are moot in view of the new ground(s) of rejections as follow:

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-2 and 9-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 9, it is confusing and unclear what is means by the step of forming a wiring by electrically connecting the first wiring pattern and the second wiring pattern (emphasis added). For the purposes of examination, it is assumed, as best understood, that the manufacturing method including the step of connecting the first wiring pattern and the second wiring pattern.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2871

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-2 and 9-10 are rejected under 35 U.S.C 102(a) as being anticipated by

Applicant's admitted prior art (APA), figures 7A-7B.

The above claims are anticipated by APA figures 7A-7B which discloses a manufacturing method of display device comprising the step of:

. forming a first display device pattern and a first wiring pattern (705) over a substrate (101) by exposing to light through a reticle (102);

. forming a second display device pattern and a second wiring pattern (706) by exposing to light through the same reticle (102);

. electrically connecting the first wiring pattern and the second wiring pattern and led out to an edge of the substrate (figure 7A)

. separating the plurality of display devices (see figure 7B).

#### ***Allowable Subject Matter***

5. Claims 3-8 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter:

The references of record neither disclose nor make obvious a manufacturing method of display device comprising a combination of various steps as claimed including the step of bringing a detachable and conductive component into contact with the wiring on the edge of the substrate to be processed as well as the step of detaching the conductive component from the wiring as set forth in claims 3 and 6.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
